Did you know Office 365 is the one destination for email, calendars, files, contacts and tasks?

During your morning train commute you can coordinate meetings on the go, access synchronized contacts, check your task list and use intelligent tools to manage your inbox so you can quickly deal with the most important matters. Work is now connected and accessible.

Did your Office 365 is the one destination for email, calendars, files, contacts and tasks?

During your morning train commute you can coordinate meetings on the go, access synchronized contacts, check your task list and use intelligent tools to manage your inbox so you can quickly deal with the most important matters. Work is now connected and accessible.

"Our CEO challenged us to identify better ways to connect all our employees. Microsoft helped us launch from a legacy communication infrastructure to a solution that provided better business value to all of our people (with Exchange Online)."

Kevin Flowers, IT Director, Coca-Cola Enterprise

"Office 365 is far easier to use than Notes was. With the 25-gigabyte mailbox for each user, plus archiving services, our employees no longer have to spend time sorting through their emails and deleting old files."

— Mike Strause, IT Architect, Godiva Chocolatier

You need email that's simple and powerful. Now people will have 50GB of storage for all their messages and the ability to send an email up to 25MB.

Office 365 Exchange Online: Communicate on the move, safely

Email for the way you work today

Email is a natural and consistent part of your daily work life. Make sure you’re using a service that understands what you need.

With the capabilities included in Office 365, you’re not only getting a service built on enterprise experience and security, but also the latest innovative and easy-to-use collaboration and communication features.

"Office 365 is far easier to use than Notes was. With the 25-gigabyte mailbox for each user, plus archiving services, our employees no longer have to spend time sorting through their emails and deleting old files."

— Mike Strause, IT Architect, Godiva Chocolatier

Protect data in your email. Keeping messages encrypted outside of the company was a tricky endeavor—until now. Your employees can now send encrypted emails to anyone. If the recipient responds, or even if they forward the message to someone else, the encryption remains in place.

"Office 365 is far easier to use than Notes was. With the 25-gigabyte mailbox for each user, plus archiving services, our employees no longer have to spend time sorting through their emails and deleting old files."

— Mike Strause, IT Architect, Godiva Chocolatier

Anti-spam and anti-malware protection. Office 365 applies a layer of anti-spam and anti-malware protection across a global network of datacenters to prevent infection via email. And your employees have control over their spam-quarantined messages.

"Office 365 is far easier to use than Notes was. With the 25-gigabyte mailbox for each user, plus archiving services, our employees no longer have to spend time sorting through their emails and deleting old files."

— Mike Strause, IT Architect, Godiva Chocolatier

Simplify scheduling. The perfect team tool, Office 365 lets you check calendars and retrieve contacts from any device. You can avoid scheduling hassles by easily sharing calendars and viewing other’s availability.

"Our CEO challenged us to identify better ways to connect all our employees. Microsoft helped us launch from a legacy communication infrastructure to a solution that provided better business value to all of our people (with Exchange Online)."
